

## Skip counting by 2's using the number line

To learn skip counting by 2's, kids can use a hundred chart or a number line. This lesson teaches about the [skip counting by 2's](#) using a number line. Look at the hops of the frog and follow the arrows to learn skip counting by 2's

To skip count by 2's the frog is going to hop by skipping one number as shown:

See, how the frog started to hop at one and keep hopping till it reaches to 21. This is the simplest example of the skip counting by 2's, using a number line.

So, the skip counting by 2's is skipping a number: **1, 3, 5, 7, 9, 11, 13, 15, 17, 19, 21**

Now, on the number line given below write from 1 to 20 and start at "2" and make hops (arrows) for skip counting by 2's, which will be like 2, 4, 6, 8 and so on to 20.
